Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This office action is in response to the amendment filed on October 8, 2003.

Claims 1-33 are pending in this application.

Election/Restriction

This application contains claims having subject matter (i.e., X is S or NH) drawn to an invention nonelected with traverse in Paper No. 8. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

The amendment filed on October 8, 2003 overcomes the rejection under 35 U.S.C. 102(b) of the previous office action based on the elected species. As per the guidelines of MPEP § 803.02, the search was expanded to other value of A, specifically :  and art was found.

The following rejections are withdrawn:

1. The rejections under 35 U.S.C. 112, second paragraph of the previous office action are withdrawn in view of the amendments and/or remarks.

2. The rejection under 35 U.S.C. 101 of the previous office action is withdrawn in view of the amendments.

Art Unit: 1624

3. The rejection under 35 U.S.C. 102(b) of the previous office action is withdrawn in view of the amendments.

The following rejections are necessitated by the amendment:

Claim Rejections - 35 U.S.C. § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-33 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In formula I, the definition of the term " A " has been amended to include the group '1-oxo-3-phenyl-2-propenyl'

in the amendment filed on October 8, 2003, which is not described in the specification for the genus of formula I. Applicant relies on the examples as support for the amendment. Such group is found in Examples 5 and 6, the generic disclosure however, does not support the above

Art Unit: 1624

amendment of inserting an additional group for A. The above insertion of an extra A group is not described within the genus of formula I and the myriad of permutations that are present within the genus of formula I do not include all of the permutations possible in addition to the above group and thus results in species which were not made or contemplated. Further, written description of species would not support claims to the generic element. "Disclosure of two species in prior application did not provide written description to generic claims added in CIP", see *Tronzo v. Biomet, Inc.*, 156 F.3d 1154, 47 USPQ2d 1829 (Fed. Cir. 1998).

Claim Rejections - 35 U.S.C. § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-4, 21 and 32-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Kim et al., CAPLUS Abstract 132:251003 (1999). The instant claims read on the reference disclosed compound, see the compound having RN 262856-66-6.

Claim Rejections - 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made

Art Unit: 1624

to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-21, 24-27 and 32-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al., CAPLUS Abstract 132:251003 in view of Shin et al., CAPLUS Abstract 131:58671. The primary reference Kim teaches chrysin derivatives, see compound RN 262856-66-6. Claims 1-4, 21 and 32-33 read on the reference disclosed compound. Kim does not specifically teach any biological activity for the disclosed compounds. The secondary reference Shin teaches biological activity for the chrysin derivatives, see the abstract. In view of the teachings of the secondary reference, one of ordinary skill in the art would have been motivated to use the compounds of the primary reference in applications requiring biological activity.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
